About Me

I am a motivated software engineer seeking to join a forward-thinking tech company where I can continually learn, apply my technical skills, and contribute to the company's growth with responsibility and integrity.

Skills

Computer Languages:

Go, JavaScript, Python, Ruby, SQL, TypeScript

Software & Framework:

Angular, Docker, Kong, Next.js, MongoDB, Podman, React, Redis, Ruby on Rails, Vue.js

Languages:

Thai: Native language

English: Intermediate (B1)

Japanese: N5

Work Experience

Horixon T8

Software Engineer - Insurance Platform **2026 - present**

- Develop backend and frontend for an internal insurance platform: Go microservices (quotation, policy, renewal, master data, task delegation) and React + Vite
- Build policy renewal workflows, batch jobs and consumers for data sync, document generation and reporting
- Own work from API and database design to production release; configure routes on the Kong API gateway

Accenture Solutions

Backend Developer - New Core Banking System | KTB **2025 - 2026**

- Developed Golang microservices for the Arise New Core Banking System on Thought Machine (Vault Core); certified in Digital Core Banking / Vault Core Fundamentals
- Promotion & Drawdown squad in the loan lifecycle: orchestration-layer workflows, batch jobs, common libraries and database migrations
- Refined requirements with POs, BAs and ADs in Agile ceremonies alongside an Agile Coach

Backend Developer - Payment Platform | KTB **2022 - 2024**

- Developed copayment backend services integrated with Paotang and TungNgern, with event-driven processing on Kafka and orchestration layers
- Re-architected the payment system for scalability and maintainability, and rebuilt the reconciliation process
- Modernised interactions with legacy banking systems

Quality Engineer (Tester) - SCB CardX **2021 - 2022**

- End-to-end testing of backend systems: credit and loan card generation, transactions, and integrations with mobile apps, Salesforce and loyalty systems (Silverlake)
- Created test cases from user stories and performed manual testing

Riseplus Technology

Full Stack Developer **2020 - 2021**

- Gathered client requirements and developed client web applications
- Led development of an online video course platform with Angular, TypeScript, Ruby on Rails and PostgreSQL

Education

Bachelor's degree of Computer Engineering

Khon Kaen University · GPA 3.27 **2016 - 2020**

- Senior Project: PWA for crop field data collection with robotics and AI; passed the second round of the National Software Contest (NSC)
- Internship at the Bureau of Information Technology, KKU; built Android apps, Java games and Facebook API integrations
